e-HYBRID BENEFITS

GO FURTHER FOR LESS

e-HYBRID can achieve up to 217.3* miles per gallon making them more fuel efficient than pure combustion engines.

BEST OF BOTH WORLDS

Choose from either our 204PS or 272PS e-HYBRID powertrains. Drive in three modes: All electric; pure TSI engine; or a combination of the two.

FREEDOM TO MOVE

An all electric range of up to 81 miles allows for emission-free urban driving.

LOWER TAXATION

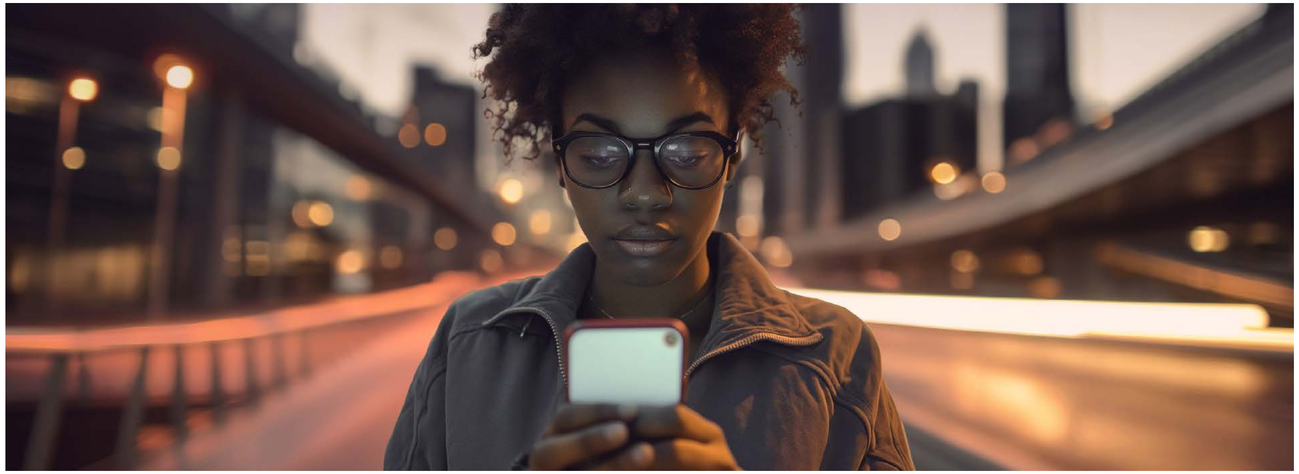

CUPRA Leon e-HYBRID models have a 6% Benefit in Kind (BiK) taxation. Lower than their equivalent combustion engine counterparts.

EFFICIENT AND CONNECTED CHARGING SOLUTIONS

Charge with either a DC fast-charger or at home with an AC wallbox. Being able to charge from 10-80% on a 50kW fast charger in 26 minutes whilst also monitoring activity via your smartphone with CUPRA CONNECT.

CUPRA Leon e-HYBRID comes with a MODE 2 (3-pin) and a MODE 3 (charging station) cable as standard.

*WLTP combined MPG.

CONNECTED BEYOND THE PHYSICAL

FORGOT WHERE YOU'VE PARKED?

Simply open the My CUPRA app and you will be able to easily locate your vehicle in cities or large parking areas.

The GPS coordinates will give you the exact address and you are then able to navigate to it through the easy to use map.

IS MY CAR SECURE?

For those moments when you're unsure if you've locked your car.

Through the My CUPRA app, authorised users can see and control the lock status of the doors and boot.

DETERMINE YOUR IDEAL TEMPERATURE

On those cold winter mornings, you'll no longer need to sit in your car while you wait for it to warm up and defrost.

With its remote temperature control, you can program the perfect temperature you want when sitting at the wheel, defrosting the windows in the process*.

WHEN IS MY SERVICE DUE?

You have enough things in your head to have to remember your next car service.

Activate automatic service scheduling and your chosen authorised service partner will contact you as soon as your vehicle detects the need of a service (inspection or relevant warning light).

*Feature only available on e-HYBRID and fully electric models.

TAKE YOUR CONNECTIVITY TO THE MAX

Just download the My CUPRA App, create an account with your personal data and introduce the chassis number of your car located on the left side of the windscreen. In only a few minutes, you will have your CUPRA in the palm of your hand.

YOUR TYRE LABEL

They may not be the first part of your CUPRA you notice, but your tyres play a vital role in keeping you on the road. Your EU tyre label tells you everything you need to know. Due to the variation of tyres that may be fitted during production, the configurator will show multiple tyre labels. It is not possible to select a specific tyre when ordering a vehicle.

You'll see more in-depth information on your tyres while configuring your car. Click **here** to start building your CUPRA now.

ENERGY EFFICIENCY

This is a measure of 'rolling resistance' – in other words, the amount of energy lost through motion. The lower the rolling resistance, the lower your energy consumption, with tyres rated as Class-A being the most efficient.

WET GRIP

Rigorous testing ensures your tyres give great handling and performance in all conditions. Wet grip specifically measures how well you can brake in wet conditions, with Grade-A giving the shortest stopping distance.

EXTERNAL NOISE

Tyres are carefully measured so you know exactly how much noise they'll make while driving. If decibels don't mean a lot to you, don't worry. Each tyre also falls into a noise Class–A being the quietest and C the loudest.

VEHICLE EXCISE DUTY

All new vehicles are subject to a form of Vehicle Excise Duty (VED) based on the type of fuel the vehicle uses and its carbon dioxide (CO_2) emission level, measured in grams per kilometre (g/km). The table below illustrates the duty you will pay based on the DVLA bandings.

The standard rate for Petrol, Diesel and Alternative Fuel Vehicles is £200. Please be aware vehicles with a list price (RRP), including options, higher than £40,000 will incur an additional £440 a year in vehicle tax. Different thresholds apply for zero emissions cars.
